## Rolling Towards a Greener Future: Public Transportation and Sustainable Urban Development

### Open-Ended Response Questions

1. Share your thoughts on why public transportation is considered more sustainable than individual car usage in urban areas. Provide at least two reasons to support your opinion.
2. Imagine you live in a city without public transportation, and you rely on a car for all your transportation needs. Discuss the potential challenges and drawbacks of such a scenario, both for you and the city.
3. As a resident of Greenburg, explain how the city's investment in public transportation has positively impacted your life and the community. Provide specific examples and experiences.
4. Imagine you are a city planner in Greenburg. Describe the steps you would take to further improve and expand the public transportation system to make it even more sustainable and accessible for all residents.
