Name _____

Water Worlds: Urban vs. Rural Clean Water Access

Open-Ended Response Questions

1. Imagine you live in a rural community with limited access to clean water. Describe a plan of action you would propose to improve clean water access and public health in your area.

2. Research and provide an example of a rural community that successfully addressed clean water access disparities. Describe the solutions implemented and their impact on the community's well-being.

3. Discuss the importance of community empowerment in addressing clean water access disparities. How can involving local residents in decision-making lead to more effective solutions?

4. Why is it essential to prioritize investments in rural water infrastructure development, and how can these investments lead to a more equitable distribution of clean water resources?
