

Name _____

Space Guardians: Protecting Earth from the Unknown

Open-Ended Response Answer Key

1. (Answers may vary) The Space Force's encounters with friendly and hostile alien species likely broadened their perspective on the cosmos. They may have realized that the universe is vast and diverse, with both potential allies and threats.
2. Dr. Emily Lawson's research was important because it provided valuable insights into potential extraterrestrial life and the motivations behind the alien attack. Her findings helped the Space Force better understand and navigate their encounters with alien species.
3. Commander Alex Foster and his team's success in their space missions can be attributed to qualities such as leadership, teamwork, courage, and determination. Their ability to work together and make quick decisions in high-pressure situations was crucial to their success.
4. The Space Force's role in protecting Earth from extraterrestrial threats was one of guardianship and defense. They were Earth's first line of defense against the unknown, patrolling the skies, and responding to threats with courage and skill.
