

Name _____

Urbanization Through the Ages: From Villages to Skyscrapers

Short Answer Key

1. Villages allowed people to settle in one place, which marked the beginning of urbanization by fostering a sense of community and permanence.
2. Universities in cities facilitated learning, knowledge-sharing, and cultural exchange, contributing to urbanization by attracting people to urban areas.
3. The invention of steam engines during the Industrial Revolution played a significant role in urbanization, powering factories and enabling industrial growth.
4. Suburbanization is the expansion of cities into surrounding suburbs, creating larger metropolitan areas. It allowed for the growth of cities with sprawling neighborhoods and suburbs.
5. Urbanization brings opportunities like better jobs and education but also challenges like overcrowding and pollution. Cities must manage growth and address these issues for the well-being of residents and the environment.
