

Name _____

The Walking Leaf: Nature's Disguise Expert

Open-Ended Response Answer Key

1. The walking leaf's leaf-like shape, color, and patterns help it blend into its surroundings, making it hard for predators to spot.
2. Different colors, like green or yellowish-brown, help walking leaves mimic the specific plants in their environment.
3. The walking leaf shows how animals can adapt in amazing ways to survive, teaching us about the importance of camouflage and evolution.
4. The walking leaf's camouflage could inspire designs in clothing, technology, or even military gear to help things blend into their environments.
