

Name _____

Where Does the Walking Leaf Live?

Short Answer Key

1. Walking leaves prefer tropical and subtropical forests.
2. High humidity keeps their bodies hydrated and prevents them from drying out.
3. Malaysia and Indonesia are two countries where walking leaves can be found.
4. The thick vegetation in their habitat allows walking leaves to blend in and hide from predators.
5. When forests are destroyed, walking leaves lose their homes and food sources, making it hard for them to survive.
