

Name _____

The Walking Leaf: Nature's Hidden Helper

Short Answer Key

1. Walking leaves eat leaves, which helps manage plant growth and supports the balance of the ecosystem.
2. Walking leaves' droppings decompose and enrich the soil, helping plants grow strong and healthy.
3. Birds and lizards are two predators of the walking leaf.
4. Supporting biodiversity ensures a healthy and balanced ecosystem where all species can thrive.
5. Camouflage helps walking leaves blend into their environment, making it harder for predators to find them.
