

Name _____

Surfing the Digital Waves: What is a Web Browser?

Short Answer Key

1. Possible Answer: Web browsers fetch and display webpages, and they can run web applications or web apps.
2. Possible Answer: Google Chrome is a popular web browser known for its speed and simplicity. It offers a wide range of extensions and add-ons that users can install to customize their browsing experience.
3. Possible Answer: A rendering engine interprets HTML, CSS, and other webpage code to display web content, while a JavaScript engine processes and executes JavaScript code, adding interactivity to webpages.
4. Possible Answer: Choosing a web browser is a matter of personal preference because different browsers offer various features, speeds, and compatibility. Factors like your operating system, the extensions you need, and your browsing habits can influence your choice.
5. Possible Answer: Web browsers are essential tools for accessing and navigating the Internet. They allow users to fetch and display webpages, access web apps, and interact with online content, making the Internet accessible and user-friendly.
