

Name _____

How Do Whales Communicate?

Short Answer Key

1. Whales make clicks, whistles, and songs to communicate.
2. Breaching may signal strength, warn of danger, or indicate playfulness.
3. Mother whales nudge their calves to guide or comfort them.
4. Interactions with other species, like dolphins, can help whales find food or stay safe.
5. Communication helps whales coordinate hunts, warn of predators, and care for their young.
