## Where Does a Llama Live?

### Short Answer Key

1. Llamas live in high-altitude areas because they can handle cold weather and rough terrain.
2. A llama's wool is thick and helps keep it warm in cold mountain climates.
3. Llamas are originally from Peru, Bolivia, Ecuador, and Chile.
4. Llamas eat grasses, herbs, and shrubs.
5. Llamas are raised in other parts of the world for their wool and as pack animals.
