

Name _____

Wild Melodies

INT. WILD HABITAT - DAY

In the heart of the wild, we meet a diverse group of animals: LEO the lion, ELLIE the elephant, CHARLIE the cheetah, GINA the giraffe, and BILLY the bird. They live harmoniously in their natural habitat.

LEO

(singing)

The wild is our home, and music is our language.

The animals use music to communicate, sending melodies through the forest.

EXT. RIVERBANK - MORNING

The animals encounter a fast-flowing river, and they need to cross it to find food.

GINA

(singing)

We'll bridge this gap with a musical map.

They sing a song about teamwork, building a bridge from logs and vines.

EXT. SAVANNAH - AFTERNOON

The animals face a predator, VICTOR the vulture. They use music to outsmart him with a catchy tune and escape.

CHARLIE

(singing)

Our music is our shield, our melodies our sword.

EXT. WATERING HOLE - EVENING

At the watering hole, they find other animals in need of help. They sing a lullaby to calm a scared baby rhino and share their resources.

ELLIE

(singing)

Our music brings peace and unity.

EXT. STARLIT NIGHT - NIGHT

Under the starry sky, the animals gather around a campfire, singing songs of gratitude for their wild and musical life.
