

Name _____

Where Do Wolves Live?

Short Answer Key

1. Wolves are commonly found in North America and Europe.
2. The most common species is the gray wolf, which thrives in forests, grasslands, and mountainous regions.
3. Wolves prefer large wilderness areas because they need space to hunt and roam.
4. Wolves help maintain balance by controlling prey populations, preventing overgrazing.
5. Humans are helping wolves by creating protected parks and wildlife reserves.
