

Name _____

The Fascinating World of Wolves

Open-Ended Response Answer Key

1. The pack structure is important because it helps wolves hunt, care for their young, and defend their territory.
2. Wolves help the environment by preventing overgrazing, which protects plants and other wildlife.
3. If wolves disappeared, prey animal populations could grow too large, leading to overgrazing and ecosystem damage.
4. Humans can help protect wolves by conserving habitats, reducing conflicts, and supporting wildlife conservation programs.
