## Capture the Perfect Shot: Choosing Your Camera

### Short Answer Key

1. The three types of cameras discussed in the passage are point-and-shoot, mirrorless, and DSLR cameras.
2. It's important to consider your budget when choosing a camera to ensure you don't overspend and stay within your financial limits.
3. One factor apart from megapixels that can affect image quality is the image sensor size, lens quality, and processing power.
4. When researching different camera models, you should pay attention to features like low-light performance, autofocus speed, and video recording capabilities.
5. It's essential to visit a camera store and hold different camera models in your hands to get a feel for their ergonomics and comfort.
