

Name _____

Where Do Zebras Live?

Short Answer Key

1. Zebras prefer open grasslands and savannas because they provide food (grass) and space to escape predators.
2. Zebras are commonly found in Kenya and Tanzania.
3. Zebras graze on grass, preventing overgrowth and keeping the grasslands healthy.
4. One challenge zebras face is habitat loss due to farming and building.
5. Savannas provide both food and shade from trees, making them ideal for zebras.
