## Stripes Under Threat: Predators and Dangers to Zebras

### Short Answer Key

1. Lions, hyenas, and cheetahs are three predators of zebras.
2. Dust bathing is when zebras roll in dirt to remove parasites like ticks, which helps them stay healthy.
3. Zebras live in herds to protect themselves, as many eyes and ears can spot predators.
4. Human activities like farming and building projects lead to habitat loss for zebras.
5. Zebras warn their herd about predators by barking loudly.
