

Name _____

A Day in the Life of a Capybara

Open Ended Key

1. Capybaras use water to stay cool, avoid predators, swim, and sometimes even sleep while floating.
2. Living in groups helps capybaras protect each other by warning of danger and staying safer in numbers.
3. Answers will vary but should reference an interesting habit, such as their swimming skills or social behavior.
4. Answers will vary but might include swimming, watching them graze, or observing their interactions with group members.
