

Name _____

What is a Capybara Life Cycle Like?

Open Ended Key

1. Teamwork helps capybara families survive by allowing adults to share responsibilities like protecting and feeding the pups, making the group stronger.
2. Answers will vary but could include: "The most interesting thing is that capybaras can swim so well because they have webbed feet."
3. Answers will vary but could describe a mix of eating grass, swimming, and staying close to the family group.
4. Living in groups provides safety from predators and allows capybaras to share resources and responsibilities.
