

Name _____

The Incredible Shrinking Kids

In the quiet suburban neighborhood of Maplewood, a group of friends, Sarah, Mark, and Lily, stumbled upon a strange discovery one sunny afternoon. As they played in Sarah's backyard, they noticed a tiny door hidden in the base of an old oak tree.

Curiosity got the best of them, and they decided to investigate. Mark, being the bravest of the bunch, opened the tiny door, and to their amazement, they were instantly shrunk to the size of ants! They looked around in astonishment as blades of grass towered above them like towering skyscrapers.

The three friends embarked on an incredible adventure in their own backyard. They crossed treacherous terrain, facing obstacles like sticky spiderwebs and raindrop rivers. They even hitched a ride on the back of a friendly ladybug who offered to help them.

Their miniature world was filled with wonders and dangers. They discovered a hidden civilization of tiny insects who taught them valuable survival skills. They learned how to build leaf forts, ride on the backs of butterflies, and communicate with the local ants.

But as the sun began to set, Sarah, Mark, and Lily realized they needed to find a way back to their normal size. They consulted the wise old cricket who revealed a magical path to a secret mushroom. They followed his instructions and ate a small piece of the enchanted mushroom, causing them to grow back to their original size.

Back in Sarah's backyard, they stared at the oak tree in amazement, knowing that they had experienced an adventure of a lifetime. They also knew that their incredible shrinking adventure would remain a secret, shared only among the three of them.
